ABOUT ME

I'm a recent Full Stack Web Development graduate with a solid background in customer service, travel and hospitality both locally and internationally. Through these customer facing roles I have been able to refine my communication and team problem solving skills.

Previous colleagues have described me as reliable, friendly, easy-going and excellent under pressure.

I value a supportive workplace that will allow me to not only build on my newly acquired skills in web development, but also to amplify the voice of Pasifika women in tech. I am passionate about combining my enthusiasm for tech to enhance a community and be a part of positive growth and change in the industry.

SKILLS SUMMARY

TEAM WORK & CONFLICT MANAGEMENT

Throughout my work experience and studies at both Mission Ready HQ and Dev Academy we did a lot of group work on projects. Most were one day projects and others multi-day using the Agile framework.

I worked extremely well with the other members of my team (4-5 people) and was nick-named Mother Hen because I was always checking up on other members making sure they were OK and that we were all on the same page in terms of the task and application MVP.

COMMUNICATION

Working as an international flight attendant with colleagues from over 140 different nationalities meant communication was crucial to ensure we uphold the seamless business class service that our passengers had come to expect.

Conveying specific ideas when it comes to web development projects was key to reaching MVP.

PROBLEM SOLVING

Since embarking on my journey to a career in web development I have been introduced to new ways of problem solving. My Google skills have been refined and I have learned to research and read technical documentation. Particularly when I created React forms I needed to learn how to validate them using Formik.

Self-taught through YouTube and Formik documentation it was such a rewarding experience to see the inputs in my React form inputs being validated.

TIME MANAGEMENT AND ORGANISATION

Naturally a very organised person I am very good at time management and found these to be key assets in the group work for development projects. I also singlehandedly planned and organise the Customer Support team's annual team building event during my time at Fraedom Ltd.

EDUCATION

ENSPIRAL DEV ACADEMY

Full Stack Web Development

Aug 2021 - Dec 2021

Technical Competencies:

- Understanding of programming fundamentals.
- TDD
- GitHub
- Debugging techniques in the browser and server
- Building a web server from scratch with Node and Express
- Web API creation, testing and consuming third party APIs.
- Migrations on relational databases
- Server side rendering using templating engines
- Social login and JSON Web tokens
- React and Redux

Practice Competencies:

- Giving and receiving feedback
- Deep listening skills
- Agile techniques and playing different roles in teams
- Presentation techniques

OTAGO POLYTECH - MISSION READY HQ

Tech Product Development Essentials

May 2021 - Jul 2021

- Select best fit solutions of existing technologies to develop a tech product solution.
- Applying tech knowledge to develop a tech product solution.
- Self-directed learning techniques.
- Apply security and development best practices to deliver quality outcome.
- Collaboration skills to work as an effective team member.

PROJECTS

BOOK A ROOKIE

Final Project, Dev Academy

Dec 2021 - Now

Book A Rookie is a web application with the intention of bringing together communities to help local fresh talent in the fields of trades and services. The pitch - to create a platform where current apprentices or fresh graduates could find work to either gain experience or build on their new skills in trades or even web development.

Tech stack used: React JS, React Redux Toolkit, Node JS, Knex JS.

Mission Ready HQ

MISSION X

Final Group Project, Mission Ready HQ

Jun 2021

Tasked to work collaboratively in a team of four to develop an application, according to specific technical and functional requirements.

The final product was a responsive application aimed at helping to make coding a fun learning experience for children. I presented my own work which included login and security with Bcrypt. I was the database administrator using MySQL and I got to work extensively with Material UI.

Tech stack used: React JS, Material UI, Node JS, Express JS, MySQL

WORK EXPERIENCE

PREMIUM CLASS FLIGHT ATTENDANT

Etihad Airways, UAE

Jul 2014 - Jan 2019

- A truly diverse workplace with over 140 nationalities allowed me to solidify my communication and team-work skills.
- Time-management, conflict resolution and flexibility to work effectively as a team under immense pressure and often stressful situations.
- Hand selected in 2018 to operate a bespoke charter flight on the A380 from SYD-AUH.

SOFTWARE SUPPORT TECHNICIAN

Fraedom, UK & AKL

Jan 2011 - Jul 2014

- Efficient and professional handling of service requests and understanding of a technical EMS product
- 2012 moved to the UK to set up the Support team in London. Knowledge sharing and teaching as the team grew.
